

Business Intelligence

The control panel for strategy execution

Objective Manager Business Intelligence gives your leaders the power and control to ensure the firm's strategic plans and objectives remain relevant and on track.

Built on the world leading Microsoft Power BI platform, our user-friendly dashboards give your leaders instant visibility of the firm's strategic performance. Insights can be easily segmented and viewed by sector, practice, location, or firm. Surfacing where strategic execution is excelling, as well as any possible issues which require attention, allows for pro-active action and decisions to be taken.

User-friendly dashboards make it easy to surface and digest how the firm is performing against its strategic plan and objectives.

Dynamic dashboards can be easily changed to show multiple views of performance by objectives, progress, status and activity.

Dynamic insights can be tailored to reflect specific insights by sector, practice, location and/or roles.

Firm Benefits

- Instant view of the firm's performance against its strategic objectives.
- Highlights which teams and individuals are delivering on strategy so you can celebrate and encourage the right behaviors and outcomes.
- Identifies where your objectives are falling behind so you can take corrective action and influence the right outcome.
- Presents managers access to instant and real-time data to support better plans and decisions.
